UNIVERGE SL2100

Communications for Small Businesses

Cloud-enabled for today's hybrid workforce – with the SL2100 + UNIVERGE BLUE CONNECT BRIDGE fully integrated hybrid solution, your cloud-based UC capabilities allow your employees to work and stay productive from anywhere.

Cloud-based voice & UC – via desktop and mobile clients seamlessly integrate with the SL2100 to allow your workforce to collaborate and be productive in the office, at home, or anywhere in between with video conferencing, chat, and file sharing/backup.

More features built-in - less extras to pay for! That means less licenses, less hardware and less options to pay for. The SL2100 also grows with your business making incremental upgrades cost-effective and scalable.

Work smarter (InUC, WebRTC) - InUC allows users to update their presence status so that other users can see if they are out sick, on vacation or at lunch and WebRTC enables collaboration via video conferencing.

Mobile Device Clients - Use your existing mobile device as a system extension complete with call control and video collaboration. Save on mobile call costs from use of Wi-Fi network and remain reachable on a single number.
